1. 【简答题】简述servlet，并介绍其生命周期

得分：0/100

学生答案：

```
开始 Untitled-1
1
2 var provinces = [
3   { name: "北京", cities: ["北京市", "天津市", "河北省"] },
4   { name: "上海", cities: ["上海市", "江苏省", "浙江省"] },
5   { name: "广东", cities: ["广东省", "广西壮族自治区", "海南省"] }
6 ];
7
8
9 function initSelectors() {
10  var provinceSelect = document.getElementById('province');
11  for (var i = 0; i < provinces.length; i++) {
12    var option = new Option(provinces[i].name);
13    provinceSelect.add(option);
14  }
15
16  var citySelect = document.getElementById('city');
17  citySelect.options.length = 0;
18 }
19
20
21 function updateCitySelector(provinceId) {
22  var citySelect = document.getElementById('city');
23  var currentProvince = provinces[provinceId];
24  if (currentProvince && currentProvince.cities) {
25    for (var i = 0; i < currentProvince.cities.length; i++) {
26      var option = new Option(currentProvince.cities[i]);
27      citySelect.add(option);
28    }
29  }
30 }
31
32
33 window.onload = function() {
34  initSelectors();
35 };
```
