1. 【简答题】实现下图功能：

得分：1/100

点击加1按钮，输入框的值实现加1
点击减1按钮，输入框的值实现减1

学生答案：<!DOCTYPE html>

```
<html>
<head>
<meta charset="UTF-8">
<title></title>
<script src="js/vue.js"></script>
<style type="text/css">
.bg_red{
background-color: red;
}
.bg_green{
background-color: green;
}
.bg_blue{
background-color: blue;
}
.txt_red{
color: red;
}
.txt_green{
color: green;
}
.txt_blue{
color: blue;
}
.txt_small{
font-size: 10px;
}
.txt_middle{
font-size: 20px;
}
.txt_big{
font-size: 30px;
}
</style>
</head>
<body>
<div id="app">
<!--<div class="bg_blue txt_red txt_middle" >-->
<div v-bind:class="cntCls" >
《JavaScript从入门到精通》
</div>
<input type="button" v-on:click="bgRed" value="背景变红" />
<input type="button" v-on:click="bgBlue" value="背景变蓝" />
<input type="button" v-on:click="bgGreen" value="背景变绿" />
<br />
<input type="button" v-on:click="txtRed" value="文字变红" />
<input type="button" v-on:click="txtBlue" value="文字变蓝" />
<input type="button" v-on:click="txtGreen" value="文字变绿" />
<br />
<input type="button" v-on:click="txtSmall" value="小" />
<input type="button" v-on:click="txtMiddle" value="中" />
</div>
</body>
</html>
```

```
<input type="button" v-on:click="txtBig" value="大" />
</div>
<script type="text/javascript">
var vm = new Vue({
  el: '#app', // 选择器: id 样式、元素选择器等 但元素选择器不能绑定body html元素
  data: {
    // cntCls: "bg_red txt_red txt_middle",
    cntCls: {
      bg_blue: true,
      bg_red: false,
      bg_green: false,
      txt_red: true,
      txt_blue: false,
      txt_green: false,
      txt_small: true,
      txt_middle: false,
      txt_big: false,
    }
  },
  methods: {
    bgRed: function() {
      this.cntCls.bg_red = true
      this.cntCls.bg_blue = false
      this.cntCls.bg_green = false
    },
    bgBlue: function() {
```

参考答案：略
