1. 【简答题】邮箱（公告.html iframe内联框架）

得分：90/100

登录 成功之后跳转到emailwelcome.html

写信 点击写信超链接右边就显示写信的页面，用户可以填写信件信息（表单元素实现），可以点击发送，调转到发送成功页面。

收件箱 点击收件箱超链接，右边显示收件箱的所有信息（表格）

草稿箱

回收箱

注册 成功之后返回登录页面

学生答案：

The student's answer consists of three parts, each showing HTML code and its corresponding browser rendering:

- Registration Form:** The HTML code defines a form with fields for username, password, and sex (radio buttons). The browser rendering shows a pink background with input fields and a '完成' (Finish) button.
- Mailbox Interface:** The HTML code uses a table to display '水利水电学校的邮箱' (Email of the School of Water Conservancy and Hydroelectricity) and links for '写信' (Write Letter) and '收件箱' (Inbox). The browser rendering shows a pink background with a table and two buttons.
- Login Form:** The HTML code defines a form with fields for '用户名' (Username) and '密码' (Password), and links for '登录' (Login) and '注册' (Register). The browser rendering shows a pink background with input fields and two buttons.

```
1 <!DOCTYPE html>
2 <html>
3   <head>
4     <meta charset="utf-8">
5     <title></title>
6   </head>
7   <body>
8     <textarea cols="100" rows="40"></textarea>
9     <input type="submit" value="提交"/>
10    <a href="0424-5.html"></a>
11  </body>
12 </html>
```
