1. 【简答题】使用占位符的方式实现登录。登录表user，字段：

得分：92/100

id, int类型主键,
username, varchar类型
password, varchar类型

学生答案：import mysql.connector

```
def login(username,password):
```

```
    sql = "SELECT id,username,`password` FROM `user` WHERE username=%s AND `password`=%s"  
    print(sql)
```

```
    conn = mysql.connector.connect(user='root',  
                                   password='123456',  
                                   host='127.0.0.1',  
                                   port='3306',  
                                   database='std_pyth',  
                                   buffered=True  
                                   )
```

```
    print("conn:",conn)  
    cursor = conn.cursor()
```

```
    cursor.execute(sql,(username,password))  
    res = cursor.fetchone()  
    print(type(res))  
    print(res)
```

```
    conn.commit()
```

```
    cursor.close()  
    conn.close()
```

```
login("lilei","123456")
```

```
login("lilei '#",'')
```

参考答案：略
