1. 【简答题】读取文本文件，并使用try、except、finally

得分：90/100

学生答案：path = r"C:\Users\...\Desktop\李白2.txt"

```
try:
    f = open(path,"rt",encoding="utf-8")
    # f.seek(6)
    print( f.read())
except FileNotFoundError as fnfe:
    # print("异常",fnfe)
    print(path+"文件不存在！")
else:
    print("没有抛出异常，执行else代码块")
# print(f.tell())
finally: # 一定会执行
    if f != None:
        f.close()path = r"C:\Users\...\Desktop\李白2.txt"

try:
    f = open(path,"rt",encoding="utf-8")
    # f.seek(6)
    print( f.read())
except FileNotFoundError as fnfe:
    # print("异常",fnfe)
    print(path+"文件不存在")
```

参考答案：略
