1. 【简答题】Vue穿梭框

得分 : 100/100

The image shows a user selection interface with two columns:

- 待选用户 (0/1):** Contains one user, 'cc'.
- 已选用户 (0/2):** Contains two users, 'aa' and 'bb'.

Navigation buttons:

- Between columns: '< 左移' and '右移 >'.
- At the bottom: '保存' and '重置'.

```

学生答案 : <template>
  <div style="text-align: center;">
    <el-transfer style="text-align: left; display: inline-block" v-model="value" :props="prop" :data="rolePool"
      :title="['待选角色','已选角色']" :button-texts="['左移','右移']">
      <el-button class="transfer-footer" slot="left-footer" size="small" @click="save()">保存</el-button>
      <el-button class="transfer-footer" slot="right-footer" size="small" @click="reset()">重置</el-button>
    </el-transfer>
  </div>
</template>
<script>
export default {
  data() {
    return {
      prop: {
        key: "id",
        label: "username"
      },
      rolePool: [],
      value: []
    }
  },
  methods: {
    save() {
      for(var a=0;a<=this.rolePool.length;a++){
        for(var b=0;b<=this.value.length;b++){
          if(this.rolePool[a].id == this.value[b]){
            alert(this.rolePool[a].username);
          }
        }
      }
    },
    getData() {
      this.$axios.get('../static/user.json').then(res => {
        console.log("axios=", res);
        this.rolePool = res.data;
      }).catch(err => {
        alert(err);
      });
    },
    reset() {
      this.rolePool = [],
      this.value = [],
      this.getData()
    }
  },
  created() {
    this.getData()
  }
}
</script>

```

参考答案 : Vue穿梭框
