1. 【简答题】

得分：100/100

- Switch 开关
- Slider 滑块
- Rate 评分
- ColorPicker 颜色选择器
- Badge 标记 
- Skeleton 骨架屏 
- Steps 步骤条
- InfiniteScroll 无限滚动 

完成星的功能

学生答案：

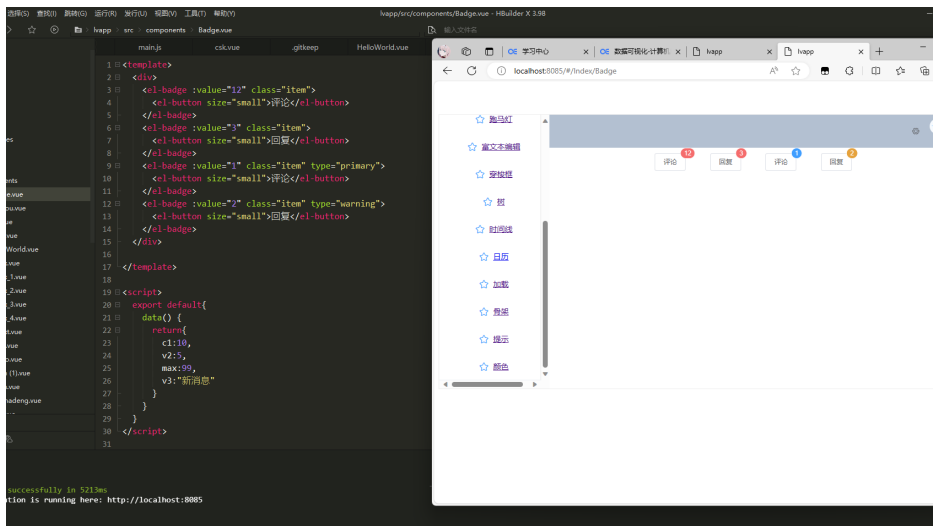

The student's answer consists of two parts, each showing a code editor on the left and a browser preview on the right.

**Top Part: Color Picker**

- Code:** Shows the implementation of a color picker component in `index.vue`. It uses `<el-color-picker>` with `show-alpha` and `predefineColors` props. A `data` object defines `color1` as `#409EFF` and `color2` as `rgba(19, 206, 102, 0.8)`.
- Preview:** Shows a browser window displaying the color picker component. The selected color is `#409EFF` with an opacity of `0.8`.

**Bottom Part: Skeleton Screen**

- Code:** Shows the implementation of a skeleton screen in `main.js`. It uses `<el-skeleton>` and `<el-skeleton-item>` components. The `key` prop is used to identify items in a list.
- Preview:** Shows a browser window displaying a skeleton screen with a list of items. The items are represented by placeholder images and text.
