1. 【简答题】

得分：100/100

完成星的功能

学生答案：

The student's answer consists of two parts:

- InfiniteScroll Component:** The code defines a component that uses the `infinite-scroll` directive. It includes a `data` object with `count: 10` and `loading: false`. The rendering shows a list of 10 items with a '没有更多了' (No more) message at the bottom.
- Skeleton Component:** The code defines a component that uses the `el-skeleton` directive. It includes a `data` object with `loading: true`, `currentDate: '2021-06-01'`, and `lists: []`. The rendering shows a loading state for a post with a placeholder image of a deer.
