

学号	姓名	提交时间	总分	成绩
19997047368	吕东旭	2024-01-05 13:31:14	100	92

1.【简答题】完成课堂案例，如下图：

得分：92/100

```

学生答案：<template>
  <div style="width:700px">
    <el-table :data="tableData" >
      <el-table-column prop="name" label="姓名" width="120">
        <template slot-scope="scope">
          <el-popover trigger="hover" placement="bottom">
            <p>住址: {{ scope.row.address }}</p >
            <div slot="reference" class="name-wrapper">
              <el-tag size="medium">{{ scope.row.name }}</el-tag>
            </div>
          </el-popover>
        </template>
      </el-table-column>
      <el-table-column prop="phone" label="手机号" width="140">
      </el-table-column>
      <el-table-column prop="sex" label="性别" width="80">
      </el-table-column>
      <el-table-column prop="date" label="出生日期" width="140">
        <template slot-scope="scope">
          <i class="el-icon-time"></i>
          <span style="margin-left: 10px">{{ scope.row.date }}</span>
        </template>
      </el-table-column>
      <el-table-column prop="nav" label="籍贯" >
      </el-table-column>
      <el-table-column label="操作" width="140">
        修改删除
      </el-table-column>
    </el-table>
  </div>
</template>

<script>
export default {
  data() {
    const item = {
      date: '2016-05-02',
      name: '王小虎',
      phone:'123123123123',
      sex:'男',
      nav:'china',
    };
    return {
      tableData: Array(20).fill(item)
    }
  }
};
</script>

<style>
</style>

```
