1. 【简答题】Vue跑马灯

得分 : 100/100

学生答案 : <!DOCTYPE html>
<html lang="en">

```
<head>
  <meta charset="UTF-8">
  <title>Document</title>
  <script src="https://cdn.jsdelivr.net/npm/vue@2/dist/vue.js"></script>
  <link rel="stylesheet" href="跑马灯.css">
</head>

<body>

  <div id="else" class="main">
    <p class="main-content">{{text}}</p>
    <span><input type="button" value="ROLL" @click="lang" class="btn"></span>
    <span><input type="button" value="STOP" @click="stop" class="btn"></span>
  </div>

  <script>
    var vm = new Vue({
      el: '#else',
      data: {
        text: "今日本店开业, 全场商品五折, 欢迎进店品尝!",
        intervalID: null
      },
      methods: {
        lang() {
          if (this.intervalID != null) return;
          this.intervalID = setInterval(() => {
            var start = this.text.substring(0, 1)
            var end = this.text.substring(1)
            this.text = end + start
          }, 400)
        },
        stop() {
          clearInterval(this.intervalID)
          this.intervalID = null
        }
      }
    })
  </script>

</body>

</html>
```

参考答案 : Vue跑马灯
