1. 【简答题】Vue富文本编辑器

得分 : 100/100

学生答案 : template>

```
<Row class-name="transfer-item">
  <Col :xs="2" :sm="9" :md="10" :lg="10">
    <Table
      border
      ref="selectionLeft"
      :height="height"
      :columns="columns"
      :data="leftData"
      @on-select-all-cancel="handleSelectLAll"
      @on-select-all="handleSelectLAll"
      @on-select-cancel="handleSelectL"
      @on-select="handleSelectL">
    </Table>
  </Col>
  <Col :xs="20" :sm="6" :md="4" :lg="4" class="transfer-switch">
    <Button
      size="large"
      type="success"
      icon="md-skip-forward"
      class="btn"
      :disabled="!selectionLeft.length"
      @click="increase">添加</Button>
    <Button
      size="large"
      type="error"
      icon="ios-skip-backward-outline"
      class="btn"
      :disabled="!selectionRight.length"
      @click="decrease">取消</Button>
  </Col>
  <Col :xs="2" :sm="9" :md="10" :lg="10">
    <Table
      border
      ref="selectionRight"
      :height="height"
      :columns="columns"
      :data="righthData"
      @on-select-all-cancel="handleSelectRAAll"
      @on-select-all="handleSelectRAAll"
      @on-select-cancel="handleSelectR"
      @on-select="handleSelectR">
    </Table>
  </Col>
</Row>
</template>
```

```
<script>
import { data, column } from './data';

export default {
  props: {
    height: {
      type: Number,
      default: () => 300
    }
  },
  data () {
    return {
      columns: [...column],
      transferData: [...data],
      righthData: [],
      leftData: [],
    }
  }
}
```
