1. 【简答题】

得分 : 100/100

完成星的功能

学生答案 : { (value)}

```
.al-badge (  
  display: inline-block  
  position: relative;  
  al-badge--content {  
    position: absolute  
    right: 10px;  
    top: 0;  
    transform: translateX(100%) translateY(-50%)  
  }  
  function skeleton(h, props, slots, ctx) {  
    if (!props.loading) {  
      return slots .default && slots .default();  
    }  
    <div class="drawer-footer">  
      <span v-if="pullstatus === $enum.STATUS.START">Pull up to load more  
    </span>  
      <span v-if="pullstatus === $enum.STATUS.LOADING">loading  
      <i class="el-icon-loading"></i> </span>  
      <span v-if="pullstatus === $enum.STATUS.NODATA">no more data  
    </span>  
    </div>  
    export defaultf  
    name:"infiniteScrollMixins" data(){  
      return {  
        pullstatus: this .$enum.STATUS .START,pageIndex:1,pagesize: 20,  
        computed:{  
          created(){  
            methods:f  
            loadMoreData()if (this .pullstatus != this.$enum.STATUS.START)return;  
            this.pullstatus = this .$enum.STATUS.LOADING;if(this.getLoadMoreData)
```
