1. 【简答题】Vue穿梭框

得分 : 100/100

学生答案：

```
<template>
  <div style="text-align: center;">
    <el-transfer style="text-align: left; display: inline-block" v-model="handleSelectedValue" :props="prop"
      :data="rolePool" :titles="['待选角色','已选角色']" :button-texts="['左移','右移]'>
      <el-button class="transfer-footer" slot="left-footer" size="small" @click="save()">保存</el-button>
      <el-button class="transfer-footer" slot="right-footer" size="small" @click="reset()">重置</el-button>
    </el-transfer>
  </div>
</template>
```

```
<script>
export default {
  data() {
    return {
      arr: [],
      handleSelectedValue: [],
      prop: {
        key: 'id',
        label: 'username'
      },
      rolePool:[]
    }
  },
  methods: {
    save() {
      this.handleSelectedValue.forEach((id) => {
        alert(id);
      })
    },
    getdata() {
      this.$axios.get('../static/user.json').then(res => {
        console.log("axios=", res);
        this.rolePool = res.data;
      }).catch(err => {
        alert(err);
      });
    },
    reset() {
      this.rolePool = [];
      this.handleSelectedValue = [];
      this.getdata();
    }
  },
  created() {
    this.getdata();
    var arr1=[{}]
  }
};
</script>
```

```
<style>
</style>
```

参考答案：Vue穿梭框
