1. 【简答题】Vue穿梭框

得分 : 100/100

The image shows a user selection interface (穿梭框) with the following components:

- 待选用户 (0/1):** A list containing the user 'cc'.
- 已选用户 (0/2):** A list containing the users 'aa' and 'bb'.
- Navigation:** Two blue buttons in the center: '< 左移' (Left) and '右移 >' (Right).
- Actions:** Two buttons at the bottom: '保存' (Save) and '重置' (Reset).

学生答案 : <template>

```
<div>
  <template style="text-align: center;">
    <el-transfer
      style="text-align: left;display: inline-block"
      v-model="value"
      :props="prop"
      :data="data"
      :titles="['待选角色','已选角色']"
      :button-text="['左移','右移']"></el-transfer><br />

    <el-button size='small' @click='save'>保存</el-button>
    <el-button size='small' @click='reset'>重置</el-button>
  </template>

</div>
</template>
```

```
<script>
import { Alert } from 'element-ui';
export default {
  data() {
    return {
      //user
      prop:{key:'id',label:'username'},
      //待选
      data:[],
      //已选
      value:[]
    };
  },
  methods:{
    save(){
      var arr=[]
      this.data.forEach((i)=>{
        this.value.forEach((id)=>{
          if(i.id=id){
            // alert(i.id)
            // alert(i.username)
            arr.push(i)
          }
        })
      })
    },
    reset(){
      this.data=[];
      this.value=[];
      this.getdata();
    },
    getdata(){

      this.$axios.get("../static/data.json").then((res)=>{

        this.data=res.data

      }).catch((err)=>{

        alert(err);
      })
    },
    created(){
      this.getdata();
    }
  };
}</script>

<style>
</style>
```

参考答案 : Vue穿梭框
