1. 【简答题】Vue穿梭框

得分：100/100

学生答案：

```

<template>
  <div>
    <p>The template element is used to declare fragments of HTML that can be cloned and inserted into the document. </p>
    <p><a href="https://developer.mozilla.org/en-US/docs/Web/HTML/Element/template">MDN Reference</a></p>
    <p>按F1打开帮助文档</p>
    <el-button class="hand-go" slot="right-footer" size="small" @click="reset_T()">重置</el-button>
  </el-transfer>
</div>
</template>

<script>
export default {
  data() {
    return {
      arr: [],
      //user: {}
      prop: {key: 'id', label: 'username'},
      //待选角色
      hand_t: [],
      //已选角色
      T_Go: []
    }
  },
  methods: {
    save_T(){
      var that=this;
      console.log(that.T_Go);
      for(var i = 0; i<that.hand_t.length ; i++){
        for(var j=0 ; j<that.T_Go.length ; j++){
          if(that.hand_t[i].id == that.T_Go[j]){
            //alert("ID: "+that.hand_t[i].id+"姓名: "+that.hand_t[i].username)
          }
        }
      }
    },
    getdata(){
      this.$axios.get('../static/user.json').then(res => {
        console.log("axios=",res);
        this.hand_t = res.data;
      }).catch(err => {
        alert(err);
      });
    },
    reset_T(){
      this.hand_t=[];
      this.T_Go=[];
      this.getdata();
    }
  },
  created() {
    this.getdata();
  }
}
</script>

<style>
</style>

```

参考答案：Vue穿梭框
